

New Generation

Cobra "Tuff-Skin Plus"

Sewer Cleaning Hose

Poly-Flow has blended **over 25 years** of hose engineering and state-of-the-art technology to provide a new revolutionary line of **Cobra "Tuff-Skin Plus"** Sewer Cleaner/Water Jetting Hose.

Building upon the current outstanding characteristic of our standard **Cobra Tuff-Skin** product, this new, proprietary, polyurethane cover compound has been specially formulated for outstanding low coefficient of friction (less drag), and superior abrasion resistance for the toughest of applications.

The new **Cobra "Tuff-Skin Plus"** product was not only designed for improved protection from the harsh environment, but for increased efficiency as well. Due to the special design, less water pressure is needed to move the hose, resulting in greater water pressure and jetting action at the nozzle.

Better Coupling Retention

By utilizing a coupling with better flow characteristics, the **Cobra "Tuff-Skin Plus"** hose has exceptional coupling retention.

75% - Coefficient of Friction

Test reports show that the new **Cobra "Tuff-Skin Plus"** cover reduces the coefficient of friction by up to 75% over standard polyurethane covers (less drag).

67% - Superior Abrasion

Tests report a 67% improvement in abrasion and chatter gouging our standard polyurethane covers with the new **Cobra "Tuff-Skin Plus"** cover.

Thicker Cover

15-20% thicker cover for added protection.

Better Bond

Proprietary bonding process that provides exceptional adhesion - tube to braid and braid to cover.
