Kroll Recycler - mobile technology for the toughest requirements

Built in Germany with decades of experience and the pursuit of innovative solutions make Kroll the leading supplier internationally of special vehicles in environmental and waste management.

Kroll offer robust and proven technology based on a standardized modular. They can also provide customised solutions and high performance devices tailored to your application.

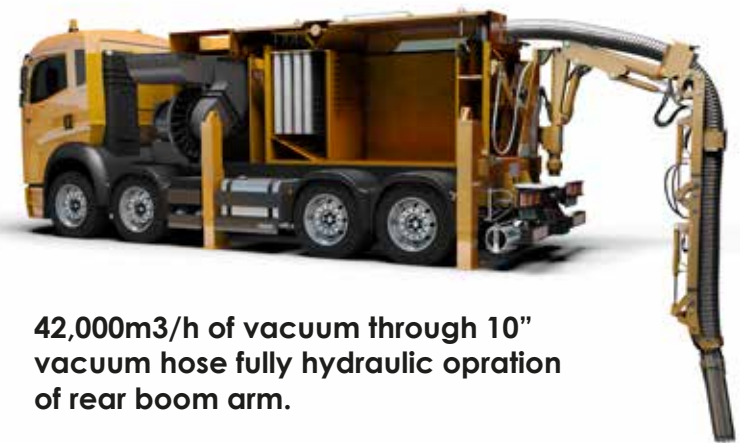

Spoutvacs close working relationship with Kroll has allowed for the design of this equipment to incorporate Australian supported product.

Featuring Bosch Rexroth hydraulics, Norgren pneumatics, Pratisoli water pumps and many other features that can be serviced and supported right here in Australia, making this product the best suited Combination Water Recycling truck for Drain Cleaning and Vacuum recovery

Spoutvac are now proud to offer the German built RSP product, known as the market leader in fan-operated suction excavation equipment. RSP have a great deal of experience in manufacturing mobile suction excavators or non-destructive digging equipment.

The RSP fan based technology can produce up to 42,000m³/h or 24,720cfm of air with a vacuum pressure of 11.8hg making it the most powerful vacuum unit available in Australia. The true advantage of this technology is its ability to vacuum excavate dry or without the use of water.

42,000m³/h of vacuum through 10" vacuum hose fully hydraulic operation of rear boom arm.

SPARE PARTS

Proteus™

Businesses worldwide have come to rely on the Proteus Crawler Inspection system, time-and-time again for efficient pipeline surveys. A system feature rich with Mini-Cam's innovative and unique connections, locks, devices, and Bluetooth® remote controlled cable reels, provides users with probably the most versatile system on the market today. With a proven track record of performance and reliability, users can rest assured the Proteus system will improve productivity, and deliver quality inspections in the most challenging environments. The rapidly expanding range of accessories ensures that the Proteus system will remain future-proof.

Whether it's water utilities, sewerage pipes or any highly important environments that are difficult to reach, our solutions have been designed and made to excel in performance, yet be so intuitive that they require only the smallest amount of training to use.

Proteus Key Features

- Future Proof
- Expandable
- Portable
- Battery powered
- Win-Can Embedded
- ProLaser Profiler
- Tractor Inspection Range 90mm – 2,200mm
- Push-Camera compatible
- Motorised or Manual Cable Drums
- Zoom Cameras
- Service Centres throughout Australia

VAC-TRON EQUIPMENT

Premium USA Manufactured product since 1997. Vac-Tron is an ever growing company by continuing to help industries and governments see the benefits of vacuum excavation in safety and productivity for projects.
